metal ion transport
inorganic ion transmembrane transport
monoatomic cation transmembrane transport
inorganic cation transmembrane transport
monoatomic ion transmembrane transport
calcium ion transport
chloride transport
sodium ion transport
calcium ion transmembrane transport
monoatomic cation transport
potassium ion transport
modulation of chemical synaptic transmission
regulation of synaptic plasticity
regulation of trans-synaptic signaling
long-term synaptic potentiation
positive regulation of synaptic transmission
neuron projection morphogenesis
axonogenesis
axon guidance
neuron projection guidance
cell morphogenesis involved in neuron differentiation
gliogenesis
axon development
regulation of axonogenesis
dendrite development
synapse organization
synapse assembly
cell junction assembly
regulation of synapse assembly
regulation of cell junction assembly
regulation of nervous
fatty
sensory perception
amine transport
regulation of membrane potential
response to salt
regulation of transporter activity
synapse organization
regulation of nervous system development
fatty acid metabolic process
regulation of chemotaxis
developmental growth involved in morphogenesis
cell-substrate adhesion
vesicle-mediated transport in synapse
protein localization to synapse
G protein-coupled receptor signaling pathway
positive regulation of leukocyte migration
alcohol metabolic process
Rho protein signal transduction
actin filament bundle organization
sterol metabolic process
regulation of cytosolic calcium ion concentration
regulation of transmembrane transport
regulation of neuron projection development
behavior
actin filament-based process
inorganic anion transport
